

President Donald Trump Women of Color First 100 Days Report Card

WWW.CELIE.ORG

	Subject/Activity	Grade	Comments
1	Budget & Appropriations	D	Stakeholders want to increase funding for key non-defense discretionary investments, including those that help students graduate from college and support HBCUs and MSIs, protect core safety net programs that help vulnerable families, and enact responsible tax reform that raises revenue to help address the nation's needs. President Trump appears poised to cut an additional \$54 billion in funding from already under-funded non-defense discretionary programs. And he has put forward tax proposals that will result in large deficits and future budget cuts while padding the pockets of the wealthy.
2	Child Welfare	D-	Stakeholders express animated concerns related to proposed budget cuts and the impact on foster care, TANF, SNAP. The block-granting of Medicaid and status of the Earned Income Tax Credit also identified as issues. Mixed-status immigrant families identified as particularly at risk.
3	Civil Rights	D-	The appointment of AG Jeff Sessions and actions taken related to immigration detention and deportation of those protected under DACA top WOC stakeholder list of concerns.
4	Criminal Justice	F	Executive Orders are imbalanced in favor of law enforcement. The Violence Against Women Act and re-activation of private prisons, particularly alarming. Concerns raised related to disparity in charges related to drug use e.g., opioids vs. marijuana affects POC disproportionately. Ban the Box efforts perceived at risk.
5	Diversity & Inclusion	D+	No policies articulated that mirror community requests. The "Hire American" policy may in some ways contribute to the employment of more people of color considering changing demographic but at the disadvantage of other groups, which is a major concern. Reduction of federal workforce also a concern.
6	Economic Security	D+	There has been no articulation of policies that will provide living wages and equal pay. Articulation of support for childcare and paid family leave is commended, along with the Executive Order for women and girls in science. Sense that policies that help women business owners and working women at risk.
7	Health	F	The attempted repeal of Obamacare and reductions to health, NIH, health professions and the Office of Minority Health are major factors contributing to the failing grade.
8	Telecommunications	D	The roll-back of Lifeline carrier participation, recent decisions related to Broadband Deployment Services, abandonment of affordable prison rate policies and concerns re: privacy and net neutrality top list of concerns.

First Term: President of the United States
